

# Still A Serious Contender In The Ring

With over 15 years of field experience, the **R-26 PACESETTER** unloader continues to provide *High Capacity* and dependable service. Its basic approach to performance is exemplified with its large 26" rotor housing, complete with wear-resistant *stainless steel* back wrapper, shear plate and 4 pawl faces. Reversible 8½' Drive Ring for consistency under all feed conditions. Adjustable *spring loaded* guide arms for positive tracking. Durable, easy maintenance, oil bath auger and ring gear boxes. All of this with a *low price* you can afford.

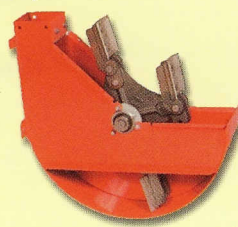

## F E A T U R E S

- Rugged 9" auger constructed with a 3-3/4" tube and 1/4" flighting for high capacity and long life.

- Combination ring oil bath gear box and clutch assembly. Stainless steel and brake lining material insure reliable and durable performance.

- Large 26" rotor housing offers high performance four pawl rotor with stainless steel adjustable pawls. Pawls can be operated in a swinging or a fixed position.
